

“ESPAÇO STARTER” – EDP VALOR DIGITAL FACTORY

Lighting Reform Project

Sotécnica made an intervention to the lighting system of “Espaço Starter” at EDP Valor’s Digital Factory, on Avenida 24 de Julho. This reformulation project aimed to standardize the distribution of lighting, the compliance with legal precepts, the architecture and the lighting control in the office’s open space.

In this project, Sotécnica ensured the implementation of the Luminaire Zumtobel Ondaria (Onda2), with an individual mounting of 34 units, which allowed a lighting and architectural harmony in the open space, achieving, at the same time, the established legal goals.
